WILLARD PHILLIPS, Pres.

JOHN C. CHEESMAN, M. D., Consulting Surgeon, 473 Broadway.

JOHN HOPPER, Solicitor and Agent, 16 Wall street.

This company has been in operation for the last three years in Boston, and has already insured above 1500 persons. Among the advantages which it presents may be enumerated the following :

1. The Company is a mutual one, of which all persons insured by it are members, and interested in the management of its concerns in proportion to the amounts which they insure.

2. It has a guaranty capital of \$100,000, which is held as a safety fund for the payment of its risks.

3. The rate of premium and deposit is so regulated as to afford the greatest possible security both to the Company and to the insured ; while at the same time it is as low as is consistent with the stability of the institution.

4. As a further security for the stability of the Company every person who insures is required to make a small deposit in addition to his premium. Such deposits are held in reserve for five years, and, if not needed for the payment of claims, they are then credited to the depositor.

5. If a policy by accident should become forfeited, the deposits made by the assured subsequent to the last periodical distribution, are paid back to him, so that the deposits still belong to the assured subject to the above conditions.

6. At each periodical distribution of the surplus, every insured member is entitled to receive back three-fourths of the surplus of his premium over and above what may be necessary to meet the liabilities of the Company. The other fourth goes into the reserved fund of the Company.

Applications or letters addressed to the subscriber in New-York will be promptly attended to, and all necessary information furnished by him.

JOHN HOPPER, Solicitor and Agent, 16 Wall-street, New-York.

# HOUSE OF INDUSTRY AND HOME FOR THE FRIENDLESS.

## An Appeal for Aid.

The important enterprise of a "*House of Industry and Home for the Friendless*" has been in contemplation for some months, and over \$1,000 have been recently contributed toward it. Such an institution is imperatively needed by the city, and the object of this appeal is to solicit from the friends of humanity further aid in its behalf. The facts strongly indicating the existing necessity for the establishment of this institution are these :

1st. It has been ascertained by careful inquiry, that there are usually within the limits of the city an average of not less than *one thousand* deserving females out of employment, and in most cases, being orphans or fatherless, they are often *homeless* and friendless—that, in consequence of the emergencies that *want* brings, they are frequently subjected to fraud, imposition, and wrong treatment, and at length to ignominy, and an early grave.

2d. That while charitable institutions have made provision for almost every other class of the needy, the *Alms-House, Watch-House, or Tombs*, are the only shelter afforded the friendless, unprotected female, whose only crime is poverty and need of employment.

It is confidently believed that such an institution would be an immense saving to the city, not only on the score of economy, but true charity, and that five-eighths of those who might be thus aided, would be saved from idleness, want, and ruin ; and instead of living to prey upon, and curse society, enduring in their own souls the un-availing anguish of remorse, they might live to honor and bless the sphere in which they move.

The House of Industry here proposed will in no way interfere with a city workhouse for paupers and vagrants—which it is hoped the authorities may erect—as its express and sole design will be to meet the wants of the *VIRTUOUS, helpless, poor*, whom, as said our Saviour, "Ye have always with you." It is for these sufferers that we plead. We would *PREVENT* their feet from going down to death. We would have a place for them, provided by Christian philanthropy, and under its especial guidance, that will enable them to help themselves. Shall we plead in vain for an object so fraught with mercy to the wretched ?

The Association who thus solicit aid, have submitted their views to various individuals, competent to judge of the expediency of the

## DESCRIPTION OF THE CITY OF NEW-YORK.

### Location of the City, Population, &c.

**NEW-YORK CITY**, the principal city of the State of New-York; and in population, wealth, and commerce, the largest city in the United States; deserves to be denominated the London of America. The City Hall is in  $40^{\circ} 42' 40''$  N. lat., and  $74^{\circ} 1' 8''$  W. long. from Greenwich, and  $3^{\circ} 0' 16''$  E. long. from Washington. It is 86 miles N. E. Philadelphia, 210 miles S. W. Boston, 225 miles N. E. Washington, 670 miles N. E. Charleston, 145 miles S. Albany, 372 miles S. Montreal, 1370 miles N. E. New-Orleans.

The compact part of the city is situated on the south end of New-York or Manhattan Island, at the confluence of Hudson or North river with the East river, which connects Long Island Sound with the harbor of New-York. The Island which contains about 14,000 acres of ground, extends from the Battery, on the south point of the island,  $13\frac{1}{4}$  miles to Kingsbridge, and has an average breadth of one mile and three-fifths. The greatest breadth, about  $2\frac{1}{2}$  miles is on the line of 88th street. It is connected with the main land on the north by three bridges: Harlem bridge, Macomb's bridge, and King's bridge.

*The Population*, in 1790, was 33,131; in 1820, 123,706; in 1840, 312,710. The population in 1845 was 366,785.

### The Harbor, Islands, Forts, &c.

The harbor of New-York is spacious and safe, the inner harbor extending 8 miles from the Narrows to the city, and several miles further up both the North and East rivers. Besides this, it has an outer harbor, extending from the Narrows to Sandy Hook consisting of Raritan Bay. Sandy Hook on which is a light-house, is 18 miles from the city; at this point there are 27 feet of water on the bar at high tide, and 21 feet at low tide. Within Sandy hook there is a good anchorage. The harbor is entered not only from the ocean at Sandy Hook and through the Narrows, but also on the northeast from Long Island Sound, as well as on the southwest through the Kills and Staten Island Sound.

After passing the bar at Sandy Hook, the channel to the city has a depth of water of from 35 to 50 feet. The average tide at the wharves is from 6 to 7 feet. The safest and best portion of the harbor, and where the vessels chiefly lie, is along East River, which is rarely obstructed from ice, as the tide sweeps through it with a strong and rapid current.

*Islands and Forts.*—Several islands within the inner harbor are attached to the city, which are Governor's, Bedlow's, and Ellis's Islands, on all of which are strong fortifications; and Blackwell's, Great Barn, and Randall's Islands, in the East River. Governor's Island is 3200 feet from the city at the Battery, and includes 70 acres of ground. It contains Fort Columbus on the south of the island, and Castle William on the northwest point, which is a round tower, 600 feet in circumference and 60 feet high, with three tiers of guns. There is also a battery on the northwest side, commanding the entrance through the Buttermilk channel. At the Narrows, on the eastern shore of Long Island, are Fort Hamilton and Fort La Fayette, the latter of which (formerly called Fort Diamond) is built on a reef of rocks, 200 yards from the shore. On Staten Island, at the Narrows, are Fort Tompkins and Fort Richmond, both of which are strong fortifications. The entrance from the Sound on East River is defended by Fort Schuyler on Throg's Neck.

### The Battery.

The Battery at the Southern end of the city, is situated at the junction of Hudson and East Rivers. It is in the form of a crescent, containing about 11 acres of ground, laid out with grass plots and gravelled walks, shaded with trees. From this spot is a fine view of the bay, its islands, and the adjacent shores of New Jersey, and Long and Staten Islands. The scene is generally enlivened by shipping under sail.

### The Park.

The Park, called in early times the *Commons*, is a triangular area of about 10½ acres, lying between Broadway, Chatham and Chambers streets, is laid out with walks, and planted with trees, and surrounded by an iron fence, which cost over \$15,000. It contains the City Hall, the new City Hall or old Alms House, and the Rotunda, now occupied by the New-York Gallery of the Fine Arts. It has also, towards its southern part, a public fountain, within a basin, about 100 feet in diameter, which has a variety of jets, which are occasionally changed. When the water is thrown in a single stream, it ascends to the height of about 70 feet, presenting a majestic and interesting appearance. The fountain is designed to be made yet more ornamental.

### The Bowling Green.

The Bowling Green, at the southern termination of Broadway, is an elliptical area, 220 feet long and 140 feet broad, enclosed by an iron fence. It existed before the American Revolution, and formerly contained a leaden statue of George III., which was converted into bullets at that period. It contains a public fountain, which is supplied by the Croton water-works. In the centre of a large basin is placed a rude pile of huge rocks in a somewhat circular form, about 15 feet in diameter, and as many feet high, and from the top issues a jet, with small jets around it, and presents, by the water pouring and tumbling down the sides of the rocks, a wild and picturesque appearance.

### Hudson Square, or St. John's Park.

Hudson Square, or St. John's Park, between Beach, Laight, Varick, and Hudson streets, is private property, belonging to Trinity Church, but has been reserved as a permanent public square. It is beautifully laid out with walks, shaded with trees, and surrounded by an iron fence, which cost \$26,000. It contains about four acres of ground, has a public fountain, and is, perhaps, the most ornamental spot in the city.

### Washington Square.

Washington Square, a mile and a half north of the City Hall, between Wooster and M'Dougal streets, contains about 9½ acres of ground. Two-thirds of the area was the Potter's Field until 1827, the remainder was purchased by the city for about \$78,000, and the whole is enclosed by a wooden fence, which cost nearly \$3,000. It is laid out in walks and planted with trees.

### Union Place.

Union Place, at the northern termination of Broadway is in an elliptical form, enclosed with a fine iron fence, having a public fountain in the centre with ornamental jets, and is a delightful breathing-place to the inhabitants. Farther up the city are other public squares, as Madison Square, Hamilton Square, and others, not yet

regulated. On the east are Tompkins Square and Bellevue, the latter the seat of the almshouse.

### Croton Water Works.

The cheapest and most convenient mode of visiting the Distributing Reservoir in Fortieth-street, or the Receiving Reservoir in Eighty-sixth-street, is by the cars of the Harlem Rail Road, which leave the Depot, at the junction of Chatham and Centre streets, opposite the City Hall, every 15 minutes during the day.

*Extent of the supply of water.*—The minimum flow of water in the river, where the dam is constructed, is considered to be twenty-seven millions of gallons for every twenty-four hours, which would be a sufficient supply for one million of inhabitants. It is considered that the supply for the present is abundant, even during a season of drought, for one million and a half of inhabitants, nearly five times the present population; and other streams can be turned into the Croton, if the time ever arrives when the population of the city will require an increased supply.

*Velocity of the water.*—The velocity of the water in the aqueduct has been ascertained to be about one mile and a half an hour where it is two feet deep.

*The Dam*—is 250 feet long, 70 feet wide at bottom, and 7 feet at top, and 40 feet high, built of stone and cement. It creates a pond five miles long, covering a surface of 400 acres, and contains 500,000,000 gallons of water.

*The Aqueduct*—proceeds from the dam, sometimes tunneling through solid rocks, crossing valleys by embankments, and brooks by culverts, until it reaches Harlem river, a distance of 33 miles. It is built of stone, brick, and cement, arched over and under six feet three inches wide at bottom, seven feet eight inches at the top of the side walls, and eight feet five inches high, has a descent of thirteen and a quarter inches per mile, and will discharge sixty millions of gallons in twenty-four hours.

*Aqueduct Bridge at Harlem River.*—The Aqueduct will cross Harlem river on a magnificent bridge of stone, 1,450 feet long, with 15 arches, 8 of them 80 feet span, and 7 of 50 feet span, 114 feet above tide water at the top, and will cost \$900,000. This bridge is in progress; and for the present the water is brought across the river in an iron pipe, laid as an inverted syphon.

*The Receiving Reservoir*—is at Eighty-sixth-street, 38 miles from the Croton Dam, covers 35 acres, and contains 150 millions of gallons.

*The Distributing Reservoir*—at Fortieth-street, about three miles from the City Hall, constructed with stone and cement, covers four acres, and is 43 feet high above the street, is 36 feet deep when full of water, and holds 20 millions of gallons. Thence the water is distributed in the city in iron pipes, laid deep under ground, to be secure from frost. A section of the wall on one side of the Reservoir, including the embankment, is 17 feet wide at the top, 35 feet wide at the distance of 16 feet below the top, and 76 feet wide at the bottom. An iron railing bounds the outside and inside of the walk around the top. This Reservoir may be considered the termination of the Croton Aqueduct, and is distant from the Fountain Reservoir at the Croton, forty and a half miles.

*Estimated Cost.*—It was at first estimated that it would cost five or six millions of dollars; and at the city charter election of 1835, the citizens were required to vote for or against supplying the city in

this way. The whole number of votes given was 17,330, of which 5,963 were against it, and 11,367 in favour of it.

*Cost of the Work—Extent of Pipe laid.*—the whole cost of the work will be about \$14,000,000. There are laid between the Distributing Reservoir in Fortieth street and the Battery, 162 miles and 3,665 feet of pipe, from 6 to 36 inches in diameter, the majority of which is from 6 to 12 inches diameter; and free hydrants are opened in most of the streets, besides the fire hydrants. There are 1400 fire, and 600 free hydrants.

*Introducing of the Water.*—The water was introduced into this Reservoir on the 4th July, 1842, and on the 14th of October following, the water was introduced into the city.

*Analysis of the Croton Water.*—Croton water, taken from the Croton Dam, when perfectly clear, was found to contain 4.998, or about *five grains* of solid matter to the gallon. Schuylkill water, taken from the middle basin, on Fairmount, (Philadelphia,) contained 4.08 grains of solid matter to the gallon.

*Influence of the introduction of the Croton Water on the Rates of Insurance.*—The tax to defray the interest of the Croton Water Debt is 20 cents on the 100 dollars, and the average reduction on the rates of insurance is at least 40 cents on the 100 dollars. In illustration of the above, the Board mention the following:—One who pays water rent for near forty houses, relates the result of a calculation he made, viz: He compared the rate of insurance he paid on this property previous to the introduction of Croton water, with the rate he pays at present, and added to it the Croton water tax, and subtracting the two last from the first, the result is a clear saving of 25 per cent. Another states, that he insures on his stock 30,000 dollars; previous to the introduction of the water he paid 85 cents on the 100 dollars; he now pays for the same property 35 cents on the hundred dollars, a saving of 150 dollars. If he paid the Croton water tax on the above amount, it would be 60 dollars, leaving a nett gain of 90 dollars.

*Receipts and Expenditures for 1846.*—According to the annual Report of the Croton Aqueduct Board for 1846, the receipts for the year ending the 30th April 1846, were \$164,532 53; exceeding the amount received in the corresponding period of time 1844-5, \$45,949 79; and the expenditure for the same period, \$58,433 67, which is a decrease from the year 1844-5 of \$14,928 00. There have been laid down during the year four miles of pipe making 163 miles now in use. Owing to the increase of the revenue, the tax upon real and personal estate was reduced from 21 cents on the hundred dollars in 1844 to 16 cents in 1845, and it may be reasonably expected that each succeeding year the reduction will be in almost equal rates.

*Number of Permits issued.*—The whole number of Permits issued to the first day of May, 1846, was 12,247, which represent nearly 13,000 water takers; being an increase of about 3400, since the 1st of May, 1845. The discrepancy between the number of permits and the number of water takers, arises from a number of houses, steamboats, &c., being included in one permit.

The following statement will show the revenue received since the organization of the Department in October 1842.—From October 3, 1842, to May 1, 1843, \$17 838 67; from May 1, 1843, to May 1, 1844, 91,790 60; from May 1, 1844, to May 1, 1845, 118,582 74; from May 1, 1845, to May 1, 1846, 164,532 53. The expenditures from 1st May,

1843, to 1st May, 1844, were \$233,198 76 ; from 1st May, 1844, to 1st May, 1845, 73,411 78 ; from 1st May, 1845, to 1st May, 1846, 58,433 67.

#### Number of Arrivals in 1845.

The arrivals of vessels from foreign ports in New-York, in 1845, were 2044. Of these, 1,505 were American vessels, 307 were British, 76 were Bremen. The remainder were from Sweden, France, and other countries. The arrivals *coastwise*, were 5,799. Total arrivals, 7,843. Total arrivals in 1844, 7,508.

#### PASSENGERS ARRIVED FROM FOREIGN COUNTRIES.

In 1840,	62,797.	In 1843,	46,302.
1841,	57,337.	1844,	61,002.
1842,	74,949.	1845,	82,960.

#### Deaths in 1845.

According to the Report of the City Inspector, the deaths in the city of New-York, during the year 1845, were,—

Whites, males,	5,574—females	4,909	=	10,483
Colored, males,	241—females	259	=	500

5,815	5,168	Total, 10,983
-------	-------	---------------

Being an increase over the year 1844 of 2,028, and the largest number ever reported since a record of deaths has been kept in the city. Of these 132 died in other places, and were brought to this city for interment; 965 were still-born and premature, and 266, were caused by casualties, drowning, &c., leaving the actual city mortality by disease 9,620.

The number of deaths in each month, was as follows:—January, 876. February, 840. March, 968. April, 849. May, 822. June, 889. July, 1316. August, 1092. September, 871. October, 800. November, 751. December, 909.

#### The City Hall.

The City Hall, heretofore regarded the finest building in the city, and one of the finest in the United States, has a commanding situation in the middle of the Park. It has more ornament than either the Exchange or the Custom House, but less simple grandeur; though with its furniture, it is, perhaps, the most interesting building in the city. It is 216 feet long, and 105 wide; was commenced in 1803, and completed in 1812, and cost \$538,734. The front and ends are constructed of white marble, and the rear of brown freestone. It is two stories high above the basement, with a third or attic story in the centre building; and there rises from the centre a cupola, containing a clock of fine workmanship, and on the top, a colossal statue of Justice. In the upper part of this cupola is a room occupied by a watchman, whose business it is to give alarm in case of fire, as from this position he is able to overlook the whole city. Behind this, another less elevated cupola, with eight Ionic columns, contains the City Hall bell, weighing 6,910 pounds, the different number of strokes of which indicate the district in which a fire occurs. The front of the City Hall is ornamented with columns and pilasters of the Ionic, Corinthian, and Composite orders, rising above each other in regular gradation. The building is entered in front by a flight of 12 marble steps. In the centre is a double staircase, ascended by marble steps, at the top of which is a circular gallery, floored with marble, from which ten marble columns of the Corinthian order ascend to the ceiling. In the building there are twenty-eight offices and other public

rooms, the most conspicuous of which are the Governor's room, and the chambers of the Common Council and Assistant Aldermen.

The *Governor's Room* is appropriated to the use of the Governor of the State when he visits the city, and has been used as a reception room for other distinguished men who have occasionally been here. It is 52 by 20 feet. The walls of the room are hung with a fine collection of portraits, including the Governors of the State, the Mayors of the City, since the Revolution, some of the Dutch Governors, and the principal military and naval heroes of the late war, all of which are regarded as excellent likenesses.

The *Common Council Room* is 42 by 30 feet, and the president occupies the identical chair occupied by General Washington, when he presided over the first American Congress, which assembled in New-York. The seats of the aldermen are ranged in a semicircular form, in the centre of which is a table for the clerk. The room contains several fine full-length portraits, painted by Trumbull. The room of the Assistant Aldermen is handsomely fitted up.

### Hall of Records.

The *Hall of Records*, east of the City Hall, in the Park, is two stories high, with a lofty portico of four Ionic pillars on each front; and in the rear of it is the *New City Hall*, formerly the old Alms House, which contains fifteen offices, besides the Marine Court Room, and the rooms of the American Institute.

### Post Office.

ROBERT H. MORRIS, POSTMASTER.

The Post Office, formerly the *Middle Dutch Church*, is located in Nassau street, between Cedar and Liberty streets, now rented to the General Government for 7 years, at the yearly rent of \$5,000. This venerable edifice has stood for 115 years, and eight or nine successive generations (counting those who were aged at the time of its opening) have worshipped within its walls. On Sabbath evening, 11th August, 1844, the closing exercises were held in the Church, in the view of resigning it for Post Office purposes. During the Revolutionary war, in 1776, when the British took possession of the city, several of the churches were occupied and greatly injured by the British soldiery; but the Middle Dutch Church suffered the most. Being directly adjacent to the famous sugar-house, the scene of atrocious and multiplied cruelties inflicted upon American citizens, it was at one time used by the British soldiery for their quarters, for a hospital, and then for a riding school, in which British horsemanship was displayed. The whole of the interior was destroyed and rendered desolate. It was not till 1790 that the church was repaired, and again opened for divine worship.

The *Branch Post Office*, recently opened, is situated at the corner of East Broadway and Chatham Square.

*Office Hours.* From 8 A.M. to 7 P.M.

*On Sunday.* From 9 to 10 A.M., and from 12½ to 1½ P.M.

#### Custom House.

The Custom House, on the corner of Wall and Nassau streets, is a splendid building, constructed in the Doric order of Grecian architecture, of white marble, something after the model of the Parthenon at Athens. It occupies the site of the old Federal Hall, in the open gallery of which General Washington was inaugurated; and nearly over the front door is the place where he stood when the oath of office, as first President of the United States, was administered to him by Chancellor Livingston, April 30th, 1789. The building is 200 feet long, 90 feet wide, and 80 feet high. At the southern end on Wall-street, is a portico of eight purely Grecian Doric columns, 5 feet 8 inches in diameter, and 32 feet high; and on the northern end on Pine-street is a corresponding portico of similar columns. The front portico is ascended by eighteen marble steps, and the rear portico on Pine-street by only three or four marble steps. The great business hall is a splendid circular room, 60 feet in diameter, surmounted by a dome, supported by 16 beautiful Corinthian columns, 30 feet high, and at the top a skylight. On each side are 13 pilasters, in perfect keeping with the pillars on the two fronts.

*Cost of the Building.*—The cost of the building and its furniture was \$950,000; and including the ground, \$1,175,000.

The Custom House is open daily, Sundays excepted, from 10 A.M. to 3 P.M. Entries must be made before 2 P.M.

#### The United States Revenue Boarding Office,

Situated at Pier No. 1, East River, a building recently erected by the United States Government, in very good taste, commands from the cupola (which contains a revolving light) an excellent view of the harbor and the adjacent islands.

#### Merchants' Exchange.

The Merchants' Exchange is located between Wall, Exchange Place, William, and Hanover streets. It is built in the most substantial form, of blue Quincy granite, and is 200 feet long by 171 to 144 feet wide, 77 feet high to the top of the cornice, and 124 to the top of

the dome. The front on Wall-street has a recessed portico of 18 massive Grecian Ionic columns, 38 feet high and 4 feet 4 inches in diameter, each formed from a solid block of stone, and weighing 43 tons. Besides numerous rooms for various purposes, the Rotunda in the centre is 80 feet in diameter, with four recesses, making the length and breadth each 100 feet, the whole 80 feet high, surmounted with a dome, resting in part on eight Corinthian columns of Italian marble, 41 feet high, and lighted by a skylight, 25 feet in diameter. On the south side of the roof is a telegraph, which communicates with another on Staten Island; and an hourly report is sent down from the telegraph to the news room in the Exchange, for public inspection. The cost of this building, including the ground, is estimated at \$1,800,000.

### Halls of Justice.

This building, which occupies the space between Centre, Elm, Leonard, and Franklin streets, is a unique and beautiful specimen of the Egyptian style of architecture. It is 253 feet long, and 200 feet wide. The front is entered by eight steps, leading to a portico of four massive Egyptian columns. The windows, which extend to the height of two stories, have massive frames, and cornices ornamented with the winged globe and serpents. The two fronts on Franklin and Leonard streets have each two entrances, with two massive columns each; and the back entrance forms a carriage way, for taking prisoners to and from the house of detention. This building, though handsome of its kind, has a heavy and gloomy aspect, which has acquired for it the name of the *Egyptian Tombs*. It is constructed of a light colored granite, from Hallowell, Me.

The *Court of Sessions* occupies a part projecting back from the front building, the roof of which is supported by lofty Egyptian columns.

*House of Detention, or Prison.*—Within the enclosure of the Halls of Justice, and toward its back part, is the House of Detention, or Prison, 142 feet long and 45 feet wide, which is entirely separate from the outer wall and building, and consists of 148 cells, for different classes of prisoners.

### Number of Fires in 1846.

During the year, ending August 1st, 1846, there were two hundred and fifty eight fires, by which the damage to buildings amounted to \$55,301; and to stock, furniture, &c., \$219,933. During the night of the second of May last, within about six hours, ten fires occurred, all of which, except one, (the True Sun buildings) commenced in stables, and were no doubt the work of design.

*The Great Fire, July 19, 1845.*—The total loss by this fire has been variously estimated at from \$5,000,000 to \$8,000,000. The fire commenced about 3, A.M., and was not subdued till 11, a period of 8 hours. Supposing, therefore, the total loss to have been \$6,000,000, the average loss, per hour, was \$750,000; the loss, per quarter of an hour, was \$187,500; the loss, per minute, was \$12,500; and the average loss, per second, was \$208,33 $\frac{1}{3}$ .

### New Buildings.

The number of new buildings erected in the City of New-York in 1844 was 1210; in 1845. 1980, being an increase of 770.

## INSTITUTIONS.—SOCIETIES.—ASYLUMS.

### Asylums.

*Observe that the arrangement is Alphabetical.*

**BLOOMINGDALE LUNATIC**, connected with the New York Hospital, and located at Bloomingdale, or on One Hundred and Seventeenth-street, west of Avenue Tenth, 7 miles from the City Hall, is a large and fine building, attached to which are 40 acres of ground, laid out in gardens, pleasure grounds, and gravelled walks, from which is a fine view of the Hudson river and the surrounding country. The principal edifice is of stone, 210 feet long, and 60 feet wide. It cost, with its grounds, over \$200,000, and contains about 150 patients, none of whom are admitted free of charge.

**COLORÉD HOME**, for the Aged and Indigent, is located in Forty-second street, c. Av. 5. *Officers*: Miss Mary Shotwell, 1st Directress; Mrs. P. G. Arcularius, 2d Directress; Mrs. W. W. Chester, Sec.; Dr. J. D. Fitch, Treas.

**DEAF AND DUMB**.—The Deaf and Dumb Asylum, on Fiftieth-st., near Avenue Fourth, 3½ miles from the City Hall, is 110 ft. long and 60 feet wide, and will accommodate a large number of pupils, with the teachers and family of the principal. It is under a principal and eight professors. The charge for a pupil is \$130 per year, including all expenses, except clothing and travelling expenses. Persons who wish to visit it by the public conveyances, should proceed to the junction of Chatham and Centre-streets, opposite the City Hall. From this point the cars for Harlem leave every 15 minutes during the day, and pass directly by the Institution, where they stop to receive and land passengers.

**INSTITUTION FOR THE BLIND**.—Is located on Avenue 9th, near Thirty-third street, where 32 lots of land were presented to the Institution by Jas. Boorman, Esq. The Legislature in 1839 appropriated \$15,000 towards the erection of the buildings, besides which considerable donations have been made by individuals, particularly \$12,000 by the late Miles R. Burke. The pupils are taught the usual branches of English education. There is a manufacturing department, where they learn basket-making, weaving, band-box work, &c. There are usually about 60 pupils at the Institution. *Officers*: A. G. Phelps, Pres.; Isaac Wood, V.-Pres.; S. Brown, Treas.; E. Jones, Cor. Sec.; G. F. Allen, Rec. Sec.; J. W. G. Clements, Physician; Isaac Wood and J. C. Bliss, Consulting Physicians; J. Kearney Rodgers, Consulting Surgeon.

**LEAKE AND WATTS ORPHAN**—is situated at about One Hundred and Seventeenth-street, between Avenues 4th and 5th.

**LYING-IN**—for destitute females, is situated at 85 Marion-street.

**MAGDALEN FEMALE BENEVOLENT**—is situated between Eighty-eighth and Eighty-ninth streets, west of the Harlem Rail Road. *Officers*: Mrs. George Warner, 1st Directress; Mrs. Thomas Hastings, 2d Directress; Mrs. Dr. Pierson, Treas.; Mrs. S. Van Antwerp, Cor. Sec.; Mrs. J. Clibborn, Rec. Sec.; Rev. C. C. Darling, chaplain.

**NEW-YORK ORPHAN**—Is situated at Bloomingdale, near Seventy-first-street, about 5 miles from the City Hall, and is a handsome building 120 by 60 feet, connected with nine acres of ground. It was instituted in 1806. Miss Brinckerhoff, Receiving Committee, 13 University-place.

**OLD LADIES**—is located in Twentieth near Av. 2.

**ORPHAN (colored)**—Male and female, is situated in Twelfth-street between Av. 5th and 6th.

**PROT. HALF-ORPHAN**—Male and female, Av. 6 between Tenth and Eleventh.

**ROMAN CATHOLIC ORPHAN**—Is situated in Prince-street, corner of Mott-st. The establishment was incorporated in 1817, and is conducted by the Sisters of Charity, who have usually under their charge about 250 orphans of both sexes.

**ROMAN CATHOLIC HALF-ORPHAN**—Is situated in Eleventh-street, near Av. 7.

**AM. BIBLE SOC.** This Institution, located at 115 Nassau-st., was organized in 1816. Its first President was Elias Boudinot, LL.D.; its second, Hon. John Jay; its third, Richard Varick, Esq.; its fourth the Hon. John Cotton Smith. Its government is in the hands of a Board of Thirty six Lay-managers of various religious denominations. The Society has a house one hundred feet square, extending through from Nassau-street to Theatre-alley, with a Court in the centre. In this building are the offices of the Corresponding Secretary, the Financial Secretary, the General Agent and Assistant Treasurer; also the Managers' Hall, the Depository, an establishment for printing and one for binding. Something over one thousand Bibles and Testaments are prepared daily. The number issued the past year, ending May 1st, was 482,000 copies. The income of the last year was \$197,367.98, all of which was expended. The Society keeps no permanent funds and can flourish only so long as the public voluntarily sustain it. Books are sold without any profit, and furnished gratuitously when there is a necessity. They are sent annually into every State and territory of our country, and extensively into foreign lands. *Officers*: Theodore Frelinghuysen, Pres.; Rev. J. C. Brigham, Cor. Sec.; and Rev. LYCEUM OF NATURAL HISTORY.—This institution is now established in the Medical College of the University, (formerly the Stuyvesant Institute,) 659 Broadway. The Library and Collections are arranged in the second story, and occupy the whole front. Induced by the very liberal terms offered to them by the professors of the Medical College, they have removed to this building during the past year. The Lyceum was founded in 1818, and has steadily pursued its scientific objects with success. It possesses a large library, and extensive collections, in each department of natural history. The skeletons of animals, the birds, fishes, reptiles, minerals, fossils and shells, are all arranged for exhibition *gratuitously*. Three volumes, descriptive of new discoveries, have been published, and will be continued. The society is in correspondence with similar societies in Europe, and exchanges with them and others, its publications, &c., by which means the library contains several works not otherwise attainable. Its objects are the advancement of Zoology, Botany, Mineralogy, Geology, and Conchology. The meetings are held on every Monday evening throughout the year. *Officers*: Joseph Delafield, Pres.; Jno. A. Smith, Abraham Halsey, V.-Presdts.; J. H. Redfield, Cor. Sec.; R. H. Browne, Sec.; J. P. Giraud, jr., Treas.

### Rules Observed at the Banks in this City.

The Banks are open every day in the Year from ten A.M. to three in the afternoon, except Sundays, Christmas Day, New Year's Day, the 4th of July, and general Holidays, appointed by legal authority, and the Bank of New-York on Good Fridays.

The interest for discount in the banks in this city is fixed at Six per Centum per Annum, upon notes or bills not having 60 days to run. Three days of Grace are allowed, and the discount taken for the same.

Every Bill or Note offered for discount, must be delivered into the office on the day preceding the day of discount, inclosed in a sealed cover directed to the Cashier, advising the name of the person upon whose account it is offered, &c.

Bills or notes lodged at the banks for collection, are collected free of expense, except when protested for non-payment—the person lodging the same pays the charge of protest.

Deposits of money, or notes for collection, must be entered in the dealer's book at the time such deposit is made.

### EXCHANGE ON ENGLAND.

**COLLECTION OF TAXES.**

The State and County Taxes are collected by the Receiver of Taxes, at his office in the basement of the *New City Hall*, in the Park, in the rear of *the City Hall*.

The Taxes are payable on the 14th day of February.

Any person may pay his taxes prior to the first day of January, and in so doing is entitled to a discount therefrom, at the rate of 7 per cent. per annum, to be reckoned from the day of payment to the first day of February. All taxes remaining unpaid on the 15th day of February, are chargeable with a penalty of one per cent. on the amount of the tax : if remaining unpaid on the 15th of March, an additional one per cent., making two per cent. : and if not paid before the first day of April, will be chargeable with a penalty of one per cent. *per month* to date back, to October, 1846. For all taxes remaining unpaid on the 15th of April, the Receiver is authorized to issue his warrant to the Sheriff or Constable, to collect by distress and sale.

**ERRONEOUS TAXES.**

An act was passed by the State Legislature, in May, 1844, authorizing the Board of Supervisors of the city and county of New-York, to correct taxes erroneously assessed, *provided* the same did not result from the neglect of the person assessed, and provided, also, that application shall be made within six months of the date of the return of the Assessment Rolls to the Receiver. The Rolls will be returned early in October, and the time for correcting erroneous taxes therefore expires early in April.

The Board of Supervisors is composed of the following officers ; viz :—

The Mayor, Recorder, and Aldermen. David T. Valentine, No. 8 City Hall, is clerk of the Board of Supervisors.

## CELEBRATED ESTABLISHMENTS IN NEW-YORK.

*(The Arrangement is Alphabetical.)*

**MUSICAL INSTRUMENTS.**—Edward Baack, 81 Fulton-st., corner of Gold, Manufacturer and Importer of Musical Instruments, keeps constantly on hand the largest assortment of Musical Instruments, such as Flutes, Clarionets, Flageolets, Bassoons, Fifes, Drums, Cymbals, Trumpets, plain and with crooks, Valve Trumpets, Cornopians, with 2 and 3 valves, Bugles, Trombones, Bass Horns of Wood and Brass-Ophicliides, Guitars, Accordions, Violins, Violincellos, Double Bass, Bows for all String Instruments, Strings for all kinds of Instruments, Violin and Guitar Pegs, Bridges and Tail Pieces, Tuning Forks and Hammers, Patent Heads for Guitars, Violencellos and Double Bass, Mouth Pieces of Brass, German Silver and Silver, Tamborines, Banjos, &c. &c., together with every article belonging to this line of business. Having been established in this City for the last twelve years, we would invite the attention of persons wanting articles in his line to his well-known establishment.

**SILVER AND SILVER PLATED WARE, JEWELRY, WATCHES, &c.**—The establishment of Ball, Tompkins, & Black, (successors to the late well-known firm of Marquand & Co.,) No. 181 Broadway, is quite celebrated in its line, and in every respect worthy the attention of strangers, as well as others, who desire Silver, or Silver-plated Ware, Forks, Spoons, Tea-Sets, Coffee or Tea Urns, Tureens, Pitchers, Waiters, Cake or Fruit Baskets, Fruit or Dessert Knives, &c., &c.

The above establishment, having been in existence more than thirty years, is, probably, the oldest of its kind in Broadway; and from the well-known character of the gentlemen who conduct it, the articles which they manufacture to order, or sell from their cases, may be relied on as being of the quality represented. In this respect, all their merchandise is warranted, both as regards materials and workmanship. The admirers of whatever is chaste and beautiful in design, or perfect in-execution, will here find an assortment of Silver and Plated Ware, Diamond and other Jewelry, Watches, Clocks, &c. &c. &c. as rich, choice, and varied, as can be found in the city, and for which this establishment has been so long and so justly celebrated.

Strangers and others who desire to witness the progress of American artisans, in many of the above-named articles, or, to select some tasty and elegant article of jewelry to make a present, either on a matrimonial or birthday occasion, or as a keepsake, will find that the arts of design and mechanism are here combined with gold and rare gems, in a manner calculated to call forth the admiration of the most fastidious.

**CANTON TEA COMPANY, 125 Chatham and 163 Greenwich-sts.**—This establishment is the oldest and largest Tea concern in America. Their very abundant resources, as well as their extensive acquaintance with the Tea trade, give them peculiar facilities such as are exclusively their own, and perfectly unattainable by any house here existing, whatever may be their pretensions. Their integrity and punctuality, and strict regard to all principles that tend to elevate the character of a large house are well understood, and have secured for them a connection, probably larger than all other Tea establishments united. They are resolved the public shall have the full benefit of their position, and consequently are determined to sell Teas purer, more fragrant, and perfect, for the prices, than any house in America.

Their Teas being packed in packages of every size of a quarter of

a pound upwards, the wrapper next to the Tea being a heavy tinfoil, renders it unnecessary for persons who retail these celebrated Teas to be judges of the article. In their circular they invite the attention of Druggists, Patent Medicine Dealers, Booksellers, and others throughout the country, who have facilities, to make the sale of these Teas a branch of their business.

**AMERICAN STATIONERY.**—*Sealing-wax, Ink, Wafers, Indelible Ink, &c. &c.*—The establishment of Thaddeus Davids, No. 112 John-street, (nearly opposite Cliff,) is the most celebrated in the Union for the superiority of its manufactures. Mr. Davids commenced manufacturing the above articles in 1825, his attention has been sedulously directed to the greatest possible excellence of quality in all that he has made. In consequence the articles have borne the highest reputation of any in the country. They have been and are now used by Congress, in most of the National and State Public Offices, and by merchants and extensive dealers all over the Union: and they have taken the **FIRST PREMIUMS (Silver Medals)** at the **FAIR of the AMERICAN and the MECHANICS' INSTITUTES**, in New-York. Testimonials have been received from almost every quarter, attesting their superiority, and the manufacturer is proud to acknowledge that a discerning public has paid the most gratifying tribute to his exertions, by a demand for his articles far exceeding his highest expectations. Merchants and others would not only be highly gratified, but would find it to their interest to give Mr. Davids a call, while on a visit to the "**GREAT METROPOLIS.**"

**DISBROWS' EQUESTRIAN ACADEMY.**—"Time was" when horsemanship was considered an indispensable accomplishment for all who made any pretensions whatever to belong to the "upper ten thousand" of society. In the "brave old days of joust and tourney" he who could manage his steed with most skill, ease and grace, was sure to wear the guerdon of his ladye-love, and to win the admiration of the gentler sex. Nor was this art confined to knights and gentlemen alone; but the ladies fair were also more or less admired according to their proficiency in riding. The somewhat puritanic ages which succeeded the days of chivalry changed the tastes and amusements of society, and riding for amusement fell into disuse, or was confined to the soldiery and the "lower orders" of the community. Time has made a revolution, and we see in these days, a reviving taste for this most graceful and healthy exercise; and we have reason to rejoice in this, for it is an earnest that our ladies are determined to pay a greater attention to their health than fashion has permitted them to do heretofore. To manage well the noble horse, to understand his disposition, to know how to control his pace, is an art which can only be acquired from a competent teacher; and such a one can be found in the person of Mr. Wm. H. Disbrow, whose skill and knowledge of his profession is unsurpassed, in this city at least.

His school is located in the Bowery, above Vauxhall Garden, and is most admirably adapted for the purposes for which it is intended. The comforts of the *ménage*—the politeness and attention of the instructor, must commend the establishment to all who may be disposed to visit it. The charges are extremely moderate.

**GEORGE H. STOUT'S SEAL, CARD, AND GENERAL ENGRAVING ESTABLISHMENT** is situated at the corner of Maiden-lane and Broadway, opposite Howard's Hotel. This establishment has been in existence from twenty to thirty years. The most skilful artists are employed, and strangers and the community in general, may entrust

their work, in the full assurance that in the design and execution thereof the highest excellence will be attained. Wedding, Invitation and Cake Cards are engraved and printed on the purest enamelled surfaces, and card envelopes of every description, with suitable wafers, are furnished; also *Merchants' Cards* in bold and elegant styles, Seals, for Companies, State, Notarial and Counting house, Coats of Arms, Emblems and Cyphers for private use, and every thing appertaining to the business will be found at Stout's, corner of Maiden-lane and Broadway.

**CARPETINGS.**—The new and spacious store No. 323 Broadway, in the beautiful block of buildings just erected, above the Hospital, has been fitted up for the Carpeting business by Mr. J. W. Tracy, of the late firm of W. W. Chester and Co., and is furnished with a splendid assortment, in every variety, of Axminster, Wilton, Brussels, Three Ply and Ingrain Carpetings, Floor Cloths, Rugs, &c. &c.

Strangers visiting the City, will find in this establishment, every article connected with the Carpet business.

## PLACES OF AMUSEMENT IN NEW-YORK.

*(The Arrangement is Alphabetical.)*

### AMERICAN MUSEUM.

The American Museum is situated at the corner of Broadway and Ann-street. No establishment of its kind in America, has probably been conducted more efficiently and successfully than this. Its present proprietor, Mr. P. T. BARNUM, came into possession of it about the commencement of the year 1842, when it had been completely run down, and its business entirely prostrated. Indeed, it appeared to be hardly known, by the great mass of the citizens of New York, or the thousands of strangers visiting the metropolis, that such an establishment was in existence; and hence, the number of visitors was very small—hardly sufficient to defray its expenses.

No sooner, however, did Mr. Barnum take the helm of its affairs, than new life seemed to be infused into it. By means, which many considered hazardous, he was successful in awaking public attention, and in attracting both strangers and residents to view his immense collection of Natural and Artificial Curiosities, and to witness a choice variety of chaste and interesting amusements. With the apparent consciousness that he had marked out the right course for conducting such an establishment, he pressed forward in his measures, until he has succeeded in making the

**AMERICAN MUSEUM THE MOST POPULAR** place of amusement in the city of New York, and hardly a stranger fails to visit it, as one of the most attractive objects in the great commercial emporium of the Western World. During the last twelve months, not less than

**FOUR HUNDRED THOUSAND PERSONS** have visited it, and the proprietor, notwithstanding he has already enlarged his premises **THREE TIMES**, is still compelled to expand, and has made arrangements to add another very large and commodious hall to his establishment. For the convenience of Ladies and Children, he gives performances every *afternoon*, as well as evening, and uses every means to preserve the strictest order and decorum at all times.

### AMERICAN ART UNION.

American Art Union, 322 Broadway. The amount received from

those who contribute \$5 per annum, is appropriated to the purchase of paintings by American Artists, which are disposed of annually by lot, among the subscribers.

Officers.—W. C. Bryant, *Pres.*; B. H. Jervis and R. F. Fraser, *Secs.*; G. W. Austin, *Treas.*

### BOWERY THEATRE.

The Bowery Theatre is situated in the Bowery near Bayard-street. This Theatre was first opened, under the management of Charles Gilfert, in 1827, and burnt to the ground in 1829; it was then rebuilt by the late Henry Astor, and again burnt in 1836, while under the charge of Hamblin; it was then rebuilt by Dinneford, and burnt again, for the third time, in 1838; again, Phenix-like, a new building sprang from the ashes of the old one, under Hamblin's direction, to share the fate of its predecessors in the month of April, 1845; in the month of May, less than thirty days after the conflagration, the present proprietor, A. W. Jackson, took a lease of the ground and commenced the rebuilding of the present elegant edifice, which was completed and opened under his management August 4th, 1845, less than ninety days from its commencement, since which time its present proprietor has enjoyed a patronage fully equal, if not superior, to that bestowed on any of his predecessors. The present Bowery Theatre is the largest dramatic establishment in the United States, having capabilities for the production of pieces not to be surpassed by any other theatre in the world. Tragedy, Comedy, and Farce, are produced fully equal to any other theatre, while Melo-dramatic Spectacles are got up and placed before the public in the most gorgeous and expensive manner, and it is ceded on all sides, that the Bowery Theatre, in the production of this particular branch of the drama, is not surpassed in either Europe or America. The prices of admission to this magnificent house are, 25 cents to the Boxes, and 12½ cents to the Pit and Gallery. The enormous size of the building enables the proprietor to put the prices at this low rate, while, at the same time, he is constantly realizing a handsome profit.

### CASTLE GARDEN

Is built on a mole, and connected with the Battery by a bridge. It was originally erected as a fortification, and having become unnecessary for this purpose, was ceded by the United States to the corporation of the city in 1823. Within its walls 10,000 people can be accommodated, in a great amphitheatre; it is used for exhibitions, and sometimes for public meetings.

### CHATHAM THEATRE.

The Chatham Theatre is situated on Chatham-street, near the corner of Roosevelt, and almost opposite Orange-street. W. S. De-verna, manager.

### GREENWICH THEATRE

Is located at the corner of Varick and Charlton streets. This building was formerly the residence of Aaron Burr. Closed at present.

### MITCHELL'S OLYMPIC THEATRE.

This building, No. 444 Broadway, was converted into a Theatre in 1837, by Messrs. Willard & Blake, but was only under their management a few months, the enterprise meeting with very indifferent success. The establishment then for a period of nearly two years was under the control of a number of individuals, but with as little success as attended the effort of the original proprietors. In the

month of December, 1839, it came under the control of the present lessee, Mr. Mitchell.

### NATIONAL ACADEMY OF DESIGN.

The Academy of Design, located at 348 Broadway, exhibits annually a large collection of paintings by living artists. The life and antique schools of this institution are opened annually at the close of the vacation in October. No charge is made to students. The requisite for admission is an original drawing from the round, for the antique, and a full length figure, for the life school, to be approved by the council. *Council*,—A. B. Durand, *Pres.*; C. C. Ingham, *V. Pres.*; J. G. Chapman, *Cor. Sec.*; F. W. Edmonds, *Rec. Sec.*; T. S. Cummings, *Treas.*; J. Frothingham and H. C. Shumway.

### NEW YORK GALLERY OF THE FINE ARTS

Is located in the Rotunda Building, in the Park, corner of Centre-st. The payment of one dollar entitles the person, *during life*, to free admission to the Gallery. Single admission, 25 cents. Open daily.

*Officers*:—Jonathan Sturges, *Pres.*; F. W. Edmonds, *V. Pres.*; Thos. H. Faile, *Treas.*; Win. H. Johnson, *Sec.*

### NIBLO'S GARDEN

Was totally destroyed by fire on the morning of the 19th September last.

### PALMO'S OPERA HOUSE.

No. 41 Chambers-street. Closed at present.

### PARK THEATRE.

Situated in Park Row, opposite the Park, was built in 1796, altered and improved in 1806, burnt in 1820, and rebuilt in 1821. It is the property of John Jacob Astor and the heirs of John K. Beekman. The present lessee is Edmund Simpson, who became joint proprietor with the late Stephen Price, in 1816.

### VAUXHALL GARDEN

Is situated in the Bowery, between Great Jones and Eighth streets. It is conducted by Bradford Jones, and devoted to theatrical entertainments, concerts, exhibitions of fireworks, &c.

### ITEMS.

A bar of Iron (wrought), 4 lines square, supports 11 to 12 cwt.—Proportion for other dimensions as the square of surface of fracture.

A bar of white Pine, half an inch square, supports 952 lbs., suspended in direction of grain. Proportion as above.

A bar of cast Iron, one foot long and one inch square, weighs 3 2-10 lbs.

A bar of wrought Iron, one foot long, one inch square, weighs 3 4-10 lbs.

French Metre, 60 feet 3 inches. French Toise, 6 feet 4 inches.

Velocity of sound, 1,142 feet per second. Falling bodies, 16 feet first second.

Diameter of the Earth, 41,836,420 feet.

Ale gallon, 282 cubic inches. Wine gallon, 231 cubic inches.

Mile, 1760 yards—5,280 feet.

### To Measure the Contents of Pipes.

Square the diameter in inches, and divide by 10. The quotient is the number of ale gallons contained in three feet of the pipe.

*For Example,* Pipe 6 inches in diameter.—6 multiplied by 6 is equal to 36, which, divided by 10, gives 3·6, i. e. 3 gallons, 6-10ths in 3 feet of 6 inch pipe.

## Historical Memoranda of New York in Early Times.

### Gov. Kieft, the Founder of the First Church.

The motives that induced Gov. Kieft to become the founder of the first church in this city, may be best related in the words of Capt. David Pietersz de Vriez, who performed three voyages to New Netherlands, in 1630, to colonize this region. De Vriez observes :—‘ As I am every day with Commander Kieft, he told me one day that he had now made a fine tavern, built with stone, for the English, by whom, as they passed continually with their vessels from New England to Virginia, he had suffered much, and who might now take lodgings there. I told him this was very good for travellers, but that we wanted very badly for our people a church. It was a shame that, when the English vessels passed, they should see nothing but a *mean* barn in which we performed our worship ; on the contrary, the first thing that they in New England did, when they had fine dwellings built, was to erect a fine church ; we ought to do the same ; that we had good materials for it, fine oakwood, fine building stone, good lime made of oyster shells, being better than our lime in Holland. Kieft asked me then, who would like to attend to this church ? I replied, ‘ the lovers of the reformed religion, as certainly some of them could be found. He told me that he supposed I was myself one of them. as I made the proposition, and he supposed I would contribute a hundred guilders ! I replied that I agreed to do so, and that, as he was governor, he should be the first.

‘ We then elected Jochen Pietersz Kuyter, who, having a set of good hands, would soon procure good timber, he being also a devout Calvinist. We elected also Jan Claesz Damen, because he lived near the fort, and thus we four “ Kerk meesters ” formed the consistory to superintend the building of the church. The church to be built in the fort, where it would be save from the depredations of the Indians.’

### Contract for the Erection of the First Church.

The contract for the erection of this church is upon record. It was made in May, 1642, before the secretary of the New Netherlands, between William Kieft, church-warden, at the request of his brethren, the church-wardens of the church in New Netherlands, and John Ogden of Stanford and Richard Ogden, who contracted to build the church of rock-stone, 72 feet long, 52 broad, and 16 feet high above the soil, for 2,500 guilders (£416 13s. 4d.), ‘ in beaver, cash or merchandize ; to wit, if the church-wardens are satisfied with the work, so that, in their judgment, the 2,500 guilders shall have been earned, the said church-wardens will reward them with one hundred guilders (£16 13s. 4d.) more ; in the mean time assist them whenever it is in their power, and allow them the use, for a month or six weeks, of the company’s boat, to facilitate the carrying of the stone thither.’

### Erection of the First Church.

The Reformed Dutch church was erected within the fort by Gov. Kieft, in 1642.

### The Town Bell—Singular uses made of it.

The town bell was removed to this church. Besides the office of calling the devout to meeting, and announcing the hour of retirement at night, the bell was appropriated for various singular uses, as follows :

In October, 1638, a female, for slandering the Rev. E. Bogardus, was condemned to appear at Fort Amsterdam, and before the Governor and Council, 'to declare in public, *at the sounding of the bell*, that she knew the minister was an honest and pious man, and that she lied falsely.'

In 1639, all mechanics and laborers in the service of the company commenced and left work *at the ringing of the bell*, and for every neglect forfeited double the amount of their wages for the use of the attorney-general.

In 1647, all the tavern-keepers were prohibited, by the placards of Governor Stuyvesant and Council, from accommodating any clubs or selling any ardent liquor *after the ringing of the bell*, at nine o'clock in the evening.

In 1648, two runaways were summoned into court, by the *ringing of the bell*, to defend themselves.

And, in 1677, an ordinance was passed by the Common Council of New York, imposing a fine of six shillings on any member of the corporation and jurymen, who should neglect to appear in court *at the third ringing of the bell*. The bell-ringer was anciently the court-messenger. In 1661, amid his multifarious official duties, he was to assist in burying the dead and attend to *toll the bell*.

#### Public Scales in 1653.

The 'weigh,' or 'balance,' was erected in 1653, by Governor Stuyvesant, and the standard weight and measure kept in the balance-house, was according to those of the city of Amsterdam. To this standard merchants were obliged to conform, and to pay the *eyck-meester* for making their weights and measures. Goods were here also brought in bulk and weighed, before they were stored in the public store-houses.

#### The Stocks and Whipping Post.

In front of the City Hall were the stocks and whipping-post. The ducking-stool, or rather cucking-stool, was not yet erected, notwithstanding the Lutheran minister, in 1673, pleaded in bar to a public prosecution against him for striking a female, that she 'provoked him to it *by scolding*.'

#### The Pillory, Cage, and Ducking Stool.

The Dutch had the credit of introducing the wooden-horse, but the cucking-stool was reserved for the ingenuity of the English, who, deriving a sanction for their want of gallantry from the immortal authority of their Common Law, ordered, February, 1692, at a meeting of a grand Committee of the Common Council, a pillory, cage, and ducking-stool to be forthwith built.

#### Post Office in 1673.

'In the interim,' continues the proclamation of Governor Lovelace, in 1673, 'those that bee dispos'd to send Letters, lett them bring them to the *Secretary's office*, where in a lockt Box they shall be preserv'd till the Messenger calls for them. All persons paying the Post before the Bagg bee seald up. Dated at New Yorke in 10th day of December, 1672.'

#### Erection of Governor Stuyvesant's House.

Governor Stuyvesant's house or dwelling was built about four years before he surrendered his government to the English. It fronted the public wharf, and stood on the west side of the pre-

sent Whitehall street, nearly opposite the commencement of the present Water street.

#### The Public Wharf in 1558.

The public wharf and harbor, or dock, were built by the burgo-masters of the city, about the year 1658. Here vessels loaded and unloaded, and a wharfage was exacted at first, of eight stivers per last. The harbor was constructed to accommodate vessels and yachts, in which, during winter, the barques stationed there might be secured against the floating ice, for which large vessels paid annually 'one beaver, and smaller in proportion, to the city, to keep it in order.' This wharf and harbor are now a part of Whitehall street, Whitehall slip having since been formed into the river.

#### Transportation of the Mails in 1672.

The proclamation of Governor Lovelace, Dec. 10, 1672, says, 'Whereas it is thought convenient and necessary, in obedience to his Sacred Majesty's commands, who enjoynes all his subjects, in their distinct colonies, to enter into a strict alliance and correspondence with each other, as likewise for the advancement of negotiation, trade, and civill commerce, and for a more speedy intelligence and dispatch of affayres, that a messenger or Post bee authorised to sett forth.'

#### Intercourse between New York and Boston in 1672.

The proclamation of Governor Lovelace, Dec. 10, 1672, says, 'that a messenger or Post be authorized to sett forth from this city of New Yorke, *monthly*, and to travaile to Boston, from whence within that month he shall return again to this city: These are therefore to give notice to all persons concerned, That on the first day of January next (1673), the messenger appointed shall proceed on his journey to Boston.'

#### Express Line in 1673.

'If any, therefore,' says the proclamation of Governor Lovelace, in 1672, 'have any letters or small portable goods to bee conveyed to Hartford, Connecticott, Boston, or any other parts in the Road, they shall be carefully delivered according to the Directions, by a sworne messenger and Post, who is purposely employed in that affayre.'

#### Travelling from Quebec to New York in 1767.

'On Wednesday last, several gentlemen arrived here from Quebec, in Canada, in twelve days. They came over the mountains on snow-shoes to Crown Point, and from thence down Lake George on the ice.

#### Marriage License in 1732.

By his Excellency William Cosby, Esq., Captain General and Governor-in-Chief of the Provinces of New York, New Jersey, and Territories thereon depending, in America, Vice-Admiral of the same, and Colonel in His Majesty's Army, &c.

#### To any Protestant Minister.

Whereas there is a mutual purpose of Marriage between Jacob Glenn, of the City of Albany, Merchant, of the one party, and Elizabeth Cuyler, of the same City, Spinster, of the other party, for which they have desired my License, and have given Bond upon conditions, that neither of them have any lawful Let or Im-

pediment of Pre-Contract, Affinity, or Consanguinity to hinder their being joyned in the Holy Bands of Matrimony; these are therefore to authorize and impower you to Joyn the said Jacob Glenn and Elizabeth Cuyler in the Holy Bands of Matrimony, and them to pronounce Man and Wife.

*Given under my Hand and Prerogative Seal, at Fort George, in New York, the sixteenth day of October, in the sixth year of the Reign of our Sovereign Lord, George the Second, by the Grace of God, of Great Britain, France, and Ireland, King, Defender of the Faith.—A. D. 1732.*

HENDK. MORRIS, D. Sec'y.

W. COSBY.

### Laying out of the City in Streets.

In 1656, the city was laid out in streets, some of them crooked enough. It then contained 120 houses, with extensive garden lots, and 1000 inhabitants. In 1677, another estimate of the city was made, and ascertained to contain 368 houses. In 1674, an assessment of 'the most wealthy inhabitants' having been made, it was found that the sum total of 134 estates amounted to £95,000.

### Erection of Fort Amsterdam.

The name officially given to this fort, in 1673 (called James Fort by the English), was 'Fort Willem Hendrick.' It was first erected and finished, in 1635, by Gov. Van Twiller, neglected by Gov. Kieft, repaired and surrounded by a stone wall by Gov. Stuyvesant, and demolished and the ground levelled in 1790 and '91. It was situated south of the Bowling Green, on high ground, was in the shape of a regular square, with four bastions, had two gates, and mounted forty-two cannon.

### Incidents in New York of the Revolutionary War.

The following annexed account of the incidents of the revolutionary war in New York, is from Watson's Sketches of Olden Times in New York city.

'After the war had commenced, and New York was expected to be captured, almost all the Whig families, who could sustain the expense, left their houses and homes to seek precarious refuge where they could in the country. On the other hand, after the city was possessed by the British, all the Tory families who felt unsafe in the country made their escape into New York for British protection. Painfully, family relations were broken; families as well as the rulers took different sides, and "Greek met Greek" in fierce encounter.

'Mr. Brower, who saw the British force land in Kip's bay as he stood on the Long Island heights, says it was the most imposing sight his eyes ever beheld. The army crossed the East river in open flat boats filled with soldiers standing erect; their arms all glittering in the sun-beams. They approached the British fleet in Kip's bay in the form of a crescent, caused by the force of the tide breaking the intended line of boat after boat. They all closed up in the rear of the fleet, when all the vessels opened a heavy cannonade.

"All the Presbyterian churches in New York were used for military purposes in some form or other. I suspect they were deemed more Whiggish in general than some of the other churches. The clergymen of that order were, in general, throughout the war, said to be zealous to promote the cause of the revolution. The Methodists, on the contrary, then few in number, were deemed

loyalists, chiefly from the known loyalism of their founder, Mr. Wesley. Perhaps to this cause it was that the society in John street enjoyed so much indulgence as to occupy their church for Sunday night service, while the Hessians had it in the morning service for their own chaplains and people.

'The British troops were quartered in any empty houses of the Whigs which might be found. Wherever men were billeted, they marked it.

'The middle Dutch church in Nassau-street, was used to imprison 3,000 Americans. The pews were all gutted out and used as fuel. Afterward they used it for the British cavalry, wherein they exercised their men, as a riding-school; making them leap over raised windlasses. At the same place they often picketed their men, as a punishment, making them bear their weight on their toe on a sharp goad. At the same place, while the prisoners remained there, Mr. Andrew Mercein told me he used to see the "dead cart" come every morning, to bear off six or eight of the dead. The old sugar-house, which also adjoined to this church, was filled with the prisoners taken at Long Island; there they suffered much, they being kept in an almost starved condition. This starving proceeded from different motives; they wished to break the spirit of the prisoners, and to cause their desertion, or to make the war unwelcome to their friends at home. I could not find, on inquiry, that Americans in New York were allowed to help their countrymen, unless by stealth. I was told by eye-witnesses of cases, where the wounded came crawling to the openings in the wall, and begging only for one cup of water, and could not be indulged, the sentinels saying, we are sorry too, but our orders have been, "suffer no communication in the absence of your officer."

'The north Dutch church in William street was entirely gutted of its pews, and made to hold 2,000 prisoners. The Quaker meeting in Pearl street was converted into an hospital. The old French church was used as a prison. Mr. Thomas Swords told me they used to bury the prisoners on the mount, then on the corner of Grace and Lumber streets. It was an old redoubt.

'There was much robbing in the city by the soldiery at times. In this, Lord Rawdon's corps and the king's guards were said to have been pre-eminent.

'The British cast up a line of intrenchments quite across from Corlears' hook to Bunker's hill, on the Bowery road, and placed gates across the road there. The Hessians, under Knyphausen, were encamped on a mount not far from Corlears' hook.

'Mr. Andrew Mercein, who was present in New York, when most of the above-mentioned things occurred, has told me several facts. He was an apprentice with a baker who made bread for the army, and states, that there was a time when provisions, even to their own soldiery, were very limited. For instance, on the occasion of the Cork provision fleet over-staying their time, he has dealt out six-penny loaves, as fast as he could hand them, for "a hard half dollar a-piece!" The baker then gave \$20 a cwt. for his flour. They had to make oatmeal bread for the navy. Often he has seen 7s. a pound given for butter, when before the war it was but 2d.'

✠ The New York Directory for 1790, contained 4,250 names; in 1792, 5,698; in 1793, 6,438; in 1796, 7,904; and in 1799, 9,935.

### Inauguration of Washington, in New York, as the first President of the United States.

It was in the gallery of the Federal Hall, which stood on the present site of the Custom House, that George Washington was inaugurated (April 30th, 1789), the first President of the United States. The annexed account of the ceremony is from 'Spark's Life of Washington.'—

'A committee of Congress, consisting of three members of the Senate and five of the House of Representatives, was appointed to meet him in New Jersey and attend him to the city of New York. To Elizabethtown Point came many other persons of distinction, and the heads of the several departments of government. He was there received in a barge, splendidly fitted up for the occasion, and rowed by thirteen pilots in white uniforms. This was followed by vessels and boats, fancifully decorated, and crowded with spectators. When the President's barge came near to the city, a salute of thirteen guns was fired from the vessels in the harbor, and from the battery. At the landing he was again saluted by a discharge of artillery, and was joined by the governor and other officers of the State, and the corporation of the city. A procession was then formed, headed by a long military train, which was followed by the principal officers of the State and city, the clergy, foreign ministers, and a great concourse of citizens. The procession advanced to the house prepared for the reception of the President. The day was passed in festivity and joy, and in the evening the city was brilliantly illuminated.

'The first public act of the President was that of taking the oath of office. It was decided by congress, that this should be done with some ceremony. In the morning of the day appointed, April 30th, at 9 o'clock, religious services, suited for the occasion, were performed in all the churches of the city. At twelve, the troops paraded before the President's door, and soon afterwards came the committees of congress and the heads of departments in carriages, to attend him to the Federal Hall, where the two houses of congress were assembled. The procession moved forward with the troops in front, next the committees and heads of departments, then the President in a coach alone, followed by the foreign ministers, civil officers of the state, and citizens. Arrived at the hall, he ascended to the senate chamber, and passed thence to a balcony in front of the house, where the oath was administered to him in presence of the people by Chancellor Livingston. The President returned to the senate chamber, in the midst of loud acclamations from the surrounding throng of spectators, and delivered to the two branches of congress his inaugural speech. He then went on foot to St. Paul's church, where prayers were read by the bishop, and the ceremonies were closed. Tokens of joy were everywhere exhibited as on the day of his arrival, and at night there was a display of illuminations and fire-works.'

### Travelling from Cincinnati to N. York, 1823.

The Independent Press, a paper published in Cincinnati in 1823, contained the following advertisement. People were wont to travel by slow and easy stages twenty years since :

'PASSENGERS WANTED.—A wagon will start for New York city in about two weeks. Five passengers will be accommodated at \$25 each. Apply at the store of Ainsworth & Smith, corner of Walnut and Fifth streets.'

## Of the City of New York.

## EXPLANATION.

If you wish to find the location of any particular house or store,—for instance, No. 80 Allen-street, on consulting the Street Directory, you will observe that 68 Allen is on the right hand of that street and the corner of Grand, and 88 Allen on the right-hand corner of Broome: hence the desired number will be on the right-hand side of Allen-street, between Grand and Broome.

Many of the streets are very irregularly numbered: this is especially true in regard to *all* streets above Eighth and east of Avenue 5th; and in some streets the numbers change from right to left.

*Note.*—The streets above Twelfth-street are divided by Avenue 5th, into East and West—as East Thirteenth, West Thirteenth—and those streets located as above described will be found, therefore, in this work, under East and West.

### **NEW-YORK,**

*Established for the sale and application of Dr. Amos G. Hull's invented instruments, for the relief and cure of rupture, burst or breach in the groin, and also for the sale and application of*

## **DR. HULL'S UTERO-ABDOMINAL SUPPORTER,**

An instrument invented to do away with the use of internal Pessaries, in cases of Falling of the Womb, which latter instruments have been found highly debilitating in their tendency, although at first appearing to afford relief. The use of the supporter is best expressed in the language of Professor Bedford, of the University of the city of New-York :

“In order to afford relief in the more aggravated forms of Prolapsus Uteri, it is essential to remove from the uterus the superincumbent weight of the intestines, and at the same time to give support to the lower portion of the abdominal muscles. The posterior wall of the vagina is also particularly in need of assistance ; for in proportion as this is supported, in the same ratio precisely will the womb be kept in its place. The *Utero-Abdominal Supporter* has the rare merit of accomplishing these objects.

**G. S. BEDFORD, M.D.”**

*Generally*, if it be advisable to relieve the aching, dragging, and bearing-down pains incident to Prolapsus Uteri, to overcome constipation, indigestion and irregular menstruation, there is then no more certain method of effecting such purposes, than that found in the application of Dr. Hull's Abdominal Supporter.

*In Pregnancy* the Supporter checks abortion, and after confinement prevents the formation of pendulous, flabby abdomens, by restoring and preserving the original compact state of the figure.

*In Piles* the Supporter is serviceable by keeping the bowels in proper location, preventing stagnation of venous blood, and thus overcoming an important condition in the disease.

*In Prolapsus Ani* the Supporter, with a small round perineum block, affords immediate relief, by sustaining the parts of the fundament, and is the best mechanical instrument known for the cure of that distressing complaint.

The Offices, No. 4 Vesey-street, are attended by competent persons, who see personally to the application of the instruments. The ladies department is a retired, distinct parlour and fitting room, under the exclusive care of a qualified female.

**MAGNETIC MACHINES.**

By recent improvements in these machines, their power is doubled in cases of the same size, and the prices reduced to \$9, \$10, \$12 and \$14, each. They have now double the power, and run much better and with less noise than any other machines, and are much better adapted for mesmerism, as well as magnetizing patients, than any others in use. Each case is accompanied with a manual, (8th edition, pp. 234, 8vo.) in the English or French language, according to order, containing specific directions for the new method of using this instrument, and which alone can render it effective.

HERTS & SONS'

AMALGAMATED

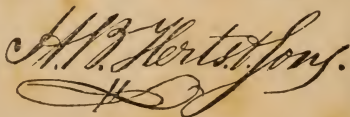

Silver, Steel, and Platina  
**PENS.**

**WARRANTED NOT TO CORRODE.**

H. B. HERTS & SONS, having been many years engaged in the Manufacture of Metallic Pens, and during that time having devoted their unceasing attention to improving and perfecting that useful and necessary article, the result of their unceasing efforts and numerous experiments has been the construction of a Pen, on a principle entirely new, combining all the advantages of the elasticity and clearness of the Quill with six times the durability of the Steel Pen; and thus entirely obviating the only objection that has hitherto existed against the use of Steel Pens.

This Pen will be found an invaluable article in Offices, as they never need wiping; also to Banks and Schools, as being made with Circular Points, they will not spatter nor cut the thinnest paper, and are warranted anti-corrosive.

CAUTION.—The universal celebrity of these Pens having induced certain disreputable Makers to foist on the public a spurious Imitation, it will please be observed, that each genuine Pen is Stamped "Herts & Sons' Patent, 1845," and each box of Genuine Pens will contain a label with a facsimile of the Manufacturers' name, "thus,"

May be had, wholesale, at the Depot, No. 88 John-street, New-York, where may also be had every description of Metallic Pens, Fancy Stationary, &c.; and retail, from all respectable Stationers in the United States.
